

AUTHENTIC DESIGN SURFACES

EVOLUTION OF POSSIBLE

Axolotl - The Leader In Surface Manufacturing Meets Voyage Select Pivot Door

Axolotl offers a diverse selection of design solutions catering to architects, designers, and builders. Their repertoire includes a wide range of genuine surfaces such as metal, concrete, and terracotta.

Established in 1995, Axolotl emerged as a pioneer in the realm of metal manipulation for surface application. Through extensive research and development, they achieved a groundbreaking feat - the capability to bond authentic metal to any substrate, transforming it into a surface that replicates the appearance of solid metal while surpassing its inherent limitations. Over the past 25+ years, Axolotl has remained committed to their core values and steadily evolved their offerings. Today, they provide a diverse range of ten fundamental surface applications, each offering endless possibilities for unique combinations and designs.

Axolotl unlocks boundless design and construction possibilities for every project, transforming it into an unparalleled wellspring of inspiration for architects and designers alike. Our devoted team is committed to collaborating with you every step of the way, ensuring the complete realization of Axolotl's potential in your vision. From inception to completion, we provide a personalized and tailored service that encompasses the entirety of your journey. With Panda and Axolotl, you can confidently embark on a transformative experience, confident in the knowledge that your project will be elevated to new heights of creativity and craftsmanship.

From the smallest sculpture to multi-storey developments, we encourage our clients to push the possibilities of what is achievable using Axolotl surfaces.

SURFACES

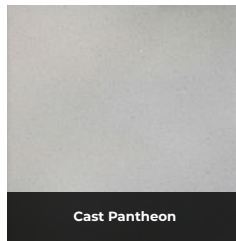

Axolotl Applied Metal is a specialist metal coating for interior and exterior applications. A revolutionary technology developed by the company, where liquified semi-precious metals such as zinc, copper or bronze can be applied to the surface of any substrate.

APPLIED METAL

Axolotl Concrete is a cutting edge, sustainable, lightweight and cost effective aesthetic alternative to solid concrete. Axolotl Concrete can be applied to virtually any solid surface at any size and shape and can be utilized in interior or exterior environments.

CONCRETE

Axolotl Terracotta retains the integrity of natural terracotta with variance in texture and colour, whilst enabling it to be utilised in situations never before considered possible in design.
